DIFFERENTIATORS

25+ YEARS

DIRECT SENIOR MICROSOFT EXPERTISE

One senior specialist leads assessment, remediation, documentation, and training - reducing handoffs, delays, and translation loss.

100% QA REVIEW

REQUIREMENTS-MAPPED DELIVERABLES

Every deliverable is traced to contract requirements, technically validated, and checked for security, accuracy, and usability before submission.

30-DAY CHECK

BEYOND-THE-DELIVERABLE FOLLOW-THROUGH

Karatin provides a prioritized risk/action register, knowledge-transfer session, and 30-day control check to confirm the solution is working as intended.

CAPABILITY NARRATIVE

Karatin LLC helps federal agencies and prime contractors secure sensitive information, strengthen Microsoft 365 compliance, and resolve complex messaging and cloud-security issues. We convert technical findings into practical controls, documented remediation, and knowledge transfer that improve audit readiness, operational resilience, and responsible AI adoption.

CORE COMPETENCIES

- Data Security and Information Protection
- DLP, sensitivity labeling, records management, retention, eDiscovery, and lifecycle governance
- Insider Risk, Communication Compliance, Information Barriers, and privacy risk management
- Microsoft 365 Copilot and AI data-security readiness
- Exchange Online, Exchange Server, and hybrid messaging engineering
- Cloud migration, mail flow, identity integration, PowerShell automation, documentation, and training

KEEPING AI DATA SECURE

PAST PERFORMANCE - SUBCONTRACTOR

ROLE DISCLOSURE: Work performed by Karatin LLC key personnel in a subcontractor role; not represented as Karatin LLC prime-contract past performance.

Data Security and Information Protection

ROLE: SUBCONTRACTOR

Work performed: Designed, configured, and supported DLP, sensitivity labels, retention, eDiscovery, Insider Risk, Communication Compliance, Information Barriers, Priva, and Data Security Posture Management for AI. **Results / customer value:** Aligned technical controls with sensitive-data handling, privacy, retention, and audit requirements.

Exchange and Cloud Messaging Engineering

ROLE: SUBCONTRACTOR

Work performed: Supported Exchange Server 2016/2019, Exchange Online, hybrid deployments, migrations, secure mail flow, SMTP relay, namespace and certificate planning, and coexistence. **Results / customer value:** Enabled secure, supportable messaging operations across on-premises and cloud environments.

Technical Issue Resolution and Operational Readiness

ROLE: SUBCONTRACTOR

Work performed: Investigated sensitive-data exposure, internal leakage, policy misalignment, mail-flow failures, and service escalations; produced governance frameworks, operating documentation, and administrator training. **Results / customer value:** Delivered corrective actions, clearer ownership, knowledge transfer, and preventive controls.
